Experienced Landman Goes Out on His Own to Provide Professional and Fair Land Services to the Region

With nearly 40 years of experience, David Klym's new company, Klym Land Services is ready to provide the best service in the industry

Cody, Wyoming (January 22, 2018) – Klym Land Services LLC, an industry leading energy and mineral resource firm, announced today the launch of a new Landman consulting practice.

As a member of the American Association of Professional Landman since 1980, and achieving 'Certified Professional Landman' status in 1991, David Klym has started his own Landwork company, [Klym Land Services LLC](#). Klym has extensive experience in the Rocky Mountain Region working directly with Landowners and industry Land Professionals to ensure sound stewardship of Land resources.

"I have 38 years of experience working federal, state, tribal and free lands that have given me the skills to handle Land responsibilities to prepare a well for oil and gas drilling for any corporation or independent oil and gas company," said Klym.

David's skill set is vast and he is eager to work with Landowners and industry Land Professionals in a number of ways. Services offered by Klym Land Services include negotiating the acquisition or divestiture of mineral rights, negotiating business agreements that provide for the exploration and/or the development of minerals and determining ownership in minerals through the research of public and private records.

"There are many rules and regulations that Landmen and Landowners need to be aware of when preparing their property for oil and gas drilling," said Klym. "My goal is to build strong relationships with all parties to assist them in understanding these rules and assist in the preparation of mutual agreements to ensure transactions are transparent and with the best interests of all in mind."

Aside from experience and credentials, one of the best honors a Landman can get is the respect of his peers. Fellow Land professional, Thomas Boyd has known Klym for more than 35 years and has nothing but praise for the work of his peer.

“David is simply one of the best in our industry,” said Boyd. “David’s experience in all aspects of energy land management, whether its oil, gas, coal or other mineral development is unparalleled. He has seen the inside of major oil corporation land departments and been the point of the spear for large and small independent companies.”

That experience is what Klym believes sets his company apart from others in the region.

"The rapid pace of this business calls for someone to work diligently and professionally with Landowners and industry Land Professionals," said Klym. "With my experience, and especially on Federal Lands in the Rocky Mountain region, oil and gas company clients can be confident Klym Land Services will handle their Land needs to get their well drilled in a timely manner."
